

Introduction of myself

Hey!

My name is Antonia Waich and I am 15 years old. Together with my parents, my sister and our dog I live in a little town called Bad St. Leonhard in Carinthia.

My mother Andrea owns a pharmacy and my father Johann is the head of medical representative at Genericon Pharma. My sister Eva studies pharmacy in Graz. Because of that she lives in Graz except on weekends. Our dog Quinn is nearly a year old so he is a bit impetuous sometimes.

I am a student at the Stiftsgymnasium St. Paul where I am attending to the 6th grade. At the moment I don't really know what I am going to do or study after my final exams, but maybe I am going to do something with wildlife or biology.

My family members are hunters, so I passed my hunting exam last summer. I know, that some people are against hunting, but it's an old tradition in our family and I grew up with it. For us hunting means the feeling of being outside and near wild animals, seeing them and be a part of the natural circulation.

I in my shooting club jacket

My friends Selli, Tony and I at a prom

Quinn really likes to sleep on our feet!

I am also in a shooting club in Preitenegg, a village near my hometown. We shoot with rifles and it's a really interesting sport, because you have to concentrate and be very precise. With my club I also shoot at competitions and I've already won a medal. I have also shot at clay pigeons and moving metal discs.

Apart from that I really like drawing, reading, watching different series and movies, playing with our dog or meeting my friends. I really like animals and I often joke that I understand and handle them better than humans.

I am really excited about the Erasmus project, because I love travelling and exploring other cities and cultures. Meeting new people is also very interesting. I am really looking forward to it!
